RAYMART ORTEGA BIASBAS

Taguig City, Metro Manila | +63 956 512 2233 | martymart025@gmail.com | linkedin.com/in/raymartbiasbas

SUMMARY

Data Scientist and AI/ML Engineer with extensive experience in Data Engineering, Analytics, Machine Learning, Artificial Intelligence, and Production Deployment. Skilled in Python, SQL, R, and cloud architectures, with a track record of building automated pipelines, optimizing data infrastructure, and deploying scalable ML models that deliver measurable business impact.

EXPERIENCE

ACCENTURE | Taguig City, Metro Manila

AI / ML Engineer (Mar 2025 – Present)

- **Core Responsibilities:** Architect and deploy production-ready AI/ML solutions utilizing Python, statistical modeling, and advanced machine learning algorithms in collaboration with cross-functional technical teams.

Key Projects & Engagements:

Diamond-Tier Global Technology Client — Innovation Data Scientist *(Oct 2026 – Present)*

- **Project Architecture & Ideation:** Designed project architectures and developed initial concepts into structured project plans aligned with business objectives.

Diamond-Tier Global Technology Client — Data Science Practitioner / Data Analyst *(Oct 2025 – Oct 2026)*

- **Dashboard Performance Optimization:** Migrated and optimized data sources and pipelines, improving dashboard refresh speeds by approximately **~70%**.
- **Data Architecture & Engineering:** Designed and implemented scalable data architectures and end-to-end automated data pipelines for executive scorecards and business dashboards, streamlining data ingestion, transformation, and reporting while eliminating manual workflows.
- **Data Governance & Quality:** Implemented automated data validation rules to ensure data integrity, reliability, and consistency across executive dashboards and business metrics.
- **Ad Hoc Operational Dashboards:** Developed ad hoc dashboards to support operational teams in monitoring key performance indicators, analyzing performance trends, and making data-driven decisions.

Confidential Client (Battery Analytics) — ML Engineer *(May 2025 – Aug 2025)*

- **Production ML at Scale:** Deployed supervised machine learning models within AzureML for real-time battery health and performance monitoring.
- **Predictive Maintenance:** Developed time-series forecasting models to detect component failures proactively, significantly reducing operational downtime.
- **Safety & Risk Intelligence:** Formulated State-of-Safety (SoS) risk quantification models to evaluate battery operational risks and ensure system reliability.

PHOENIXFIELD INC. | Taguig City, Metro Manila

Data Scientist (Jr. – Sr.) (Dec 2021 – Dec 2024)

- **User Segmentation & Visualization:** Engineered percentile-based player segmentation pipelines in SQL databases and built interactive Tableau dashboards for executive decision-making.
- **Statistical Modeling & Post-Hoc Testing:** Executed ANOVA and Tukey's HSD post-hoc tests to conduct comparative group analyses across distinct player cohorts.
- **Campaign Analytics & Impact Assessment:** Conducted statistical analyses to measure the direct impact of promotional campaigns on player engagement and user activity.
- **Forecasting & Predictive Analytics:** Built interactive R Shiny applications leveraging time-series forecasting models to optimize promotional budget allocations.
- **Experimental Design (A/B Testing):** Designed rigorous A/B testing frameworks and deployed interactive Shiny applications to evaluate control vs. test group performance.
- **Behavioral Clustering & Lifetime Value:** Segmented player bases using RFM scoring and unsupervised clustering algorithms to identify high-value VIP segments and boost profitability.
- **Automated Executive Reporting:** Streamlined executive performance reporting using R Markdown to generate automated summary statistics for product and business performance.

Business Intelligence Officer (Feb 2020 – Dec 2021)

- **Pre-Campaign Cost Optimization:** Evaluated promotional strategies prior to launch, delivering data-driven recommendations that minimized promotional expenditure and mitigated fraud risks.
- **Post-Campaign Performance Analysis:** Analyzed post-campaign metrics to extract key performance indicators and actionable insights for business stakeholders.
- **Financial Reporting & Ad-Hoc Analytics:** Aggregated core financial data to deliver comprehensive business performance reports and fulfilled ad-hoc analytical requests for leadership.
- **Reinvestment & Bonus Optimization:** Developed member reinvestment value reports to optimize bonus distribution and eliminate unnecessary promotional costs.

TECHNICAL SKILLS

- **Programming & Languages:** Python, R, SQL
- **Databases:** MS SQL Server, MySQL, PostgreSQL, SQLite
- **Big Data Frameworks:** PySpark, DuckDB, Apache Arrow
- **Visualization & BI:** Tableau, Power BI, ggplot2, Plotly, Matplotlib, Seaborn
- **Web & App Development:** Shiny, RMarkdown, HTML/CSS
- **DevOps & Version Control:** Git, GitHub, Azure DevOps
- **Cloud & Data Platforms:** Azure, AWS, GCP, Databricks, Snowflake

---

EDUCATION

POLYTECHNIC UNIVERSITY OF THE PHILIPPINES | Taguig City, Metro Manila

Bachelor of Science in Applied Mathematics (Major in Actuarial Mathematics) (Jun 2015 – May 2019)

- **Research:** *Regression Model on Factors Affecting Inflation Rate in the Philippines*

CERTIFICATIONS & TRAINING

- **Databricks Data Engineering Associate** (2025)
- **Accenture Building Data Pipelines on GCP** (2025)

- **Accenture Snowflake Essentials + Administration** (2025)
- **Accenture GenAI Bootcamp** (2025)
- **Accenture Data Visualization Foundation (Power BI + Tableau)** (2025)
- **Databricks Data + AI Summit** (2023)
- **GradientX AI & Machine Learning with Python** (2022)
- **GradientX Data Analytics with Python** (2022)
